

12VDC 5A (60Watt) MEDICALLY APPROVED desktop adapter from 80 - 264VAC, C14 connector. Medical standard EN 60601-1, 60601-1-11

## FEATURES

- Medico approved network adapter according to Medical Directive
- 12 Volt power supply 5Amp (60W)
- Desktop Power Supply EU
- Input: AC 80-264 VAC, 113-370VDC with 3-pole C14 plug
- Output: DC 12V, 5A DC
- 1m cable
- Medical safety approved (2 x MOPP)
- Approvals: ANSI / AAMI ES60601-1, TUV EN 60601-1, 60601-1-11
- Working temperature : -30-60 ° C

## SPECIFICATIONS

|                 |   |                                                                        |
|-----------------|---|------------------------------------------------------------------------|
| Operating Temp. | : | -30-60°C                                                               |
| Beskyttelse     | : | anti-overload, anti-overvoltage, short circuit protection, overheating |
| Forsyning       | : | 80...264V AC, 113...370V DC                                            |
| Kabel           | : | 1 m                                                                    |
| Output          | : | DC 12V, 5A DC                                                          |
| Stik            | : | 5,5/2,1 og IEC C14                                                     |
| Strømforsyning  | : | switched-mode                                                          |
| Virkningsgrad   | : | 88%                                                                    |
| Dimensioner     | : | 125 x 50 x 31.5mm                                                      |
