

TCW122B-CM

Remote control and measurement via Internet/LAN,  
2xDigital input, 2xAnalog, 2xRelay output, 1-wire  
sensor input, 10 - 14VDC

## FEATURES

- Module with smart temperature and humidity measurement and control
- Password protected Web based configuration and control
- 1-Wire interface for 2 temperature sensors
- 2 x analog inputs from 0 to 60VDC - 10bit resolution, 100mV display
- 2 x digital inputs with "dry contact" and "logic level" mode
- 2 x relay outputs with NO/NC contacts
- Email transmission upon alarm
- SMTP with authentication (SSL/TLS is not supported)
- SNMP v.1
- SNMP traps generated alarm
- HTTP and XML API commands
- Remote firmware update
- Supply voltage: 10 - 14VDC
