

TCW242

Data collector via Internet / LAN, 4 x Digital in, 4 x analog in, 4 x relay output, MODBUS, MQTT

FEATURES

- Web based Data Collector module with built-in WebServer
- Supports MQTT 3.1.1 protocol
- 4 x digital input Dry - external contact without voltage
- 4 x analogue inputs with 0 to 10VDC, 0-20mA
- 4 x powerful relay outputs with NO/NC contacts
- RS485 port
- MODBUS RTU up to 24 registers (sensors)
- Modbus TCP/IP support
- Data logger with memory for 70,000 loggings
- SNMP v3 support with trap alarm
- 4 schemes for real-time control of relays
- Up to 24 independent alarms
- Secure email
- XML/JSON and HTTP API commands for client-server
- Dynamic DNS support for DynDNS, No-IP and DNS-O-Matic
- NTP time sync
- Supply voltage: 10 - 28VDC - purchase PSU
- Dimensions: 145 x 90 x 40 mm
