

2 x RS422/485 seriella portar för PCI Express, 2,5KW  
isolering

## FEATURES

*PCI Express-kort med 2 x isolerade RS422/485-  
portar*

## SPECIFICATIONS

|                 |   |                                                      |
|-----------------|---|------------------------------------------------------|
| Drivere         | : | Windows 98, NT, 2000, XP, Win7, Win8, Linux og Vista |
| FIFO            | : | 128 byte FIFO                                        |
| I/O             | : | Plug and Play                                        |
| Isolation       | : | 2,5KV isolation                                      |
| Maks. hastighed | : | 921,6 Kbit/sekund                                    |
| PCI             | : | PCI Express (x1). Fungerer i alle PCI Express slot   |
| Porte           | : | 2 x RS422/485                                        |
| Profil          | : | Høj profil                                           |
| Stik            | : | 2 x DB9 han                                          |
| UART            | : | 16C950                                               |
